

Kepahulu E. Maui,
Hawaiian Islands.
Mch 14 1881.

Prof J. E. Watson

Dear Sir,

By last mail I recd your kind note enclosing one from Prof Eaton, for which please accept my thanks. By this mail I send to Prof Eaton: directed-inadvertently- to him Botanic Gardens, Cambridge Mass; a small package of ferns that I hope will please him.

This locality seems to be rich in Trichomanes and Hymenophyllum, and I hope when the weather permits of a thorough exploration of the many deep gorges-in the region of perpetual moisture-that are numerous here, to be able to collect many fine mosses etc.

With much respect

I remain

Yours very truly

J. L. Clark.
